

## **Property Owners' Association Mailbox Program**

Our mailboxes are a specialty design for residential properties on Daniel Island. Consistency in our mailbox design is one of the things that sets Daniel Island apart from other planned communities.

### **New Mailbox**

When a new home is built on Daniel Island, the initial mailbox fee and installation is included in the closing costs for the property. When construction is completed at the property, and existing construction is ongoing at adjacent properties, a temporary mailbox will be installed. Once all adjacent construction is completed, the Field Operations Team will install a permanent mailbox at the property.

### **Replacement Mailbox**

It is the property owners' responsibility to repair or repaint damaged or fading mailboxes. All repairs and painting must match the original design and color. If mailbox damage is beyond repair, the Field Operations Team will replace the mailbox for the property owner at a cost of \$400. This may be paid via check or credit card to the POA office before installation.

To replace a mailbox, the property owner will need to contact the POA Office at (843) 971-9200 and request a mailbox replacement. Once a request and full payment has been made, the Field Operations team will install a new mailbox at the property within 5-7 business days.
